

REVIEW OF POLLING DISTRICTS AND POLLING PLACES IN THE DISTRICT OF WYRE FOREST

1. This consultation paper sets out proposals for changes to the pattern of polling districts and places in the district of Wyre Forest. The Electoral Administration Act 2006 requires all local authorities to review their polling districts and polling places at least once every four years. The last such review in Wyre Forest was undertaken in 2007 and the results were agreed by Council on 28 November 2007. **Responses are sought by 5pm on Wednesday 5 January 2011 – the details of where to send your comments are in paragraph 14 below.**
2. Following the elections held in May 2010 there were comments from the public and elected members on the adequacy of some of the premises used as polling places. The review has identified that some polling stations were not suitable, particularly in terms of poor or no access for disabled people. There were others where the low number of voters makes them disproportionately expensive. A review of the polling places within the district offers an opportunity to rationalise and reduce costs without making the process of voting unduly difficult for the electorate. It can also take account of known future changes, for example in terms of buildings that will cease to be capable of being used as polling stations in the near future and new buildings that are due to become available.

Definition of terms

3. A polling district is a geographical area created by the sub division of a constituency, ward or division into smaller parts.
4. Section 18B(4)(e) of the Representation of People Act 1983 states that the polling place must be small enough to indicate to electors in different parts of the district how they will be able to reach the polling station.
5. The Electoral Commission uses the following definitions:
 - A polling place is defined as the building or area in which a polling station will be selected by the (Acting) Returning Officer.
 - A polling station is the room or area within the polling place where voting takes place. Unlike polling districts and polling places which are fixed by the local authority, polling stations are chosen by the (Acting) Returning Officer for the election.

Requirements of the review

6. It is a requirement of the review to ensure that all electors in the constituency have such reasonable facilities for voting that are practical in the circumstances.
7. It is necessary to ensure that as far as reasonable and practicable, the polling places are accessible to all electors, including those that are

disabled, and when considering the designation of a polling place to have regards to the accessibility needs of disabled persons.

8. Polling places should be within the polling district unless special circumstances make it desirable to designate an area outside the polling district.
9. In conducting the review the Council must:
 - Publish a notice that the review is being held.
 - Consult the (Acting) Returning Officer.
 - The (Acting) Returning Officer must make representation to the authority and must include information as to the location of polling stations (existing or proposed) within the polling places.
 - The Council must publish the (Acting) Returning Officer's representations within 30 calendar days of receipt.
 - The Council must seek representation from such persons as it thinks have particular expertise in relation to access to premises or facilities for persons who have different forms of disability.
 - Ensure that any elector in the area may make representations.
 - Representations may be made by any person in connection with the review including proposals for specified alternative polling places.
 - Publish the findings of the review including reasons.
10. The legislation requires that consultation is undertaken. This includes:
 - A compulsory submission from the (Acting) Returning Officer of the UK Parliamentary constituency, which then must be published by the local authority.
 - Any submissions from electors and other persons and bodies, including those with expertise in relation to premises and facilities for disabled persons.
11. The (Acting) Returning Officer must comment during the review of polling districts and polling stations. The Election rules require the (Acting) Returning Officer to decide how many polling stations are required for each polling place and to allocate electors to the polling stations in such a manner as he thinks most convenient. (Rule 25 Schedule 1 RPA 1983) The location, size and layout of any polling place/station must be a key consideration when deciding on the number of electors to be allocated to a polling station.

The review and where to send your comments

- 12 In appendix B are details from the May 2010 elections about the 51 polling places which contained a total of 63 polling stations. Information is given about the number of electors registered to vote and the number of electors who actually voted in person in May 2010. The cost of running each polling place is shown and this is also expressed as a cost per registered voter and cost per voter who voted in person. The data demonstrate that use of mobile polling stations is unnecessarily

expensive compared to hiring part or all of a building and therefore the review avoids proposals to use mobile polling stations.

13. Appendix A contains the proposals for changes that are being made in this review. There are no proposals to change polling districts. There are several proposals to change polling places and, in some cases, these involve a polling place that is outside the polling district because it is considered that there are special circumstances. Comments are now sought from local electors and interested organisations about these proposals.
14. **Comments should be sent to arrive no later than 5pm on Wednesday 5th January 2011** as follows:
