

**Council
27th July 2016**

Conservative Amendment to Motion 2:

This Council is mindful of changes to the system of future cover in Wyre Forest, including the impact on response times. It notes that the Fire and Rescue Authority is consulting on potential locations for the new emergency services hub, following its decision in principle to approve the hub subject to finding a satisfactory location.

The Council supports the Fire and Rescue Authority in ensuring that there is adequate and appropriate cover in for Wyre Forest. The Council welcomes the multi-million investment in Wyre Forest. It supports the Fire and Rescue Authority's intention not to close any of the existing stations until the hub is open and notes that there is no intention to reduce any on-call fire fighting crewing levels as a result of the move.
